

Recording Example:

DSM IV-TR

Axis I: 296.32 Major depressive disorder, recurrent, moderate

Axis II: V71.09 No Diagnosis

Axis III: none reported

Axis IV: V. 60.0 Homelessness

Axis V: GAF= 48(current)

DSM5

F33.1 Major Depressive disorder, recurrent, moderate; Z59.0 Homelessness

Note: The global assessment of functioning (GAF) scale, recommended for Axis V in the DSM-IV, was used for determinations of medical necessity for treatment by many payers and eligibility for short-and long-term disability compensation. The World Health Organization Disability Assessment Schedule (WHODAS 2.0) was judged by the DSM-5 Disability Study group to be the best current measure of disability for routine clinical use.
